Hakkımızda

About Us

Firmamız 1980 yılında otomotiv sektöründe başlamış olduğu üretim faaliyetlerine, 2000'li yılların başında madeni eşya ve mobilya alanında çalışmalarını da eklemiştir.

Özellikle metal, poliüretan ve plastik konularındaki bilgi, birikim ve uzmanlığımızla bu sektörde de adımızı duyurmaktan mutluluk duymaktayız.

6000m² kapalı alan üzerine kurulu fabrikamızda bulunan, CAD CAM ve CNC destekli kalıp bölümümüzde, kendi kalıplarımızı üretebilmekteyiz. Ayrıca son teknolojiye uygun tesisimizde Sac Lazer Kesim, Lazer Kaynak, Robotik Kaynak, Plastik Enjeksiyon, Otomatik Pres, CNC Torna, Krom Kaplama (Nikelaj), ve Elektro Statik Toz Boya bölümlerimiz de mevcuttur. Bu sayede, üretimlerimizde baştan sona kontrol ve kaliteyi yakalayabilmekteyiz.

Our company, which began its production activities in the automotive sector in 1980, expanded its operations to include metal goods and furniture at the beginning of the 2000s.

We are particularly pleased to make our name known in this sector with our knowledge, experience, and expertise in metals, polyurethane, and plastics.

In our factory, which is established on a 6000m² enclosed area, we are able to produce our own molds in our CAD CAM and CNC-supported mold department. Additionally, our state-of-the-art facility includes sections for Sheet Laser Cutting, Laser Welding, Robotic Welding, Plastic Injection, Automatic Press, CNC Lathe, Chrome Plating (Nickel Plating), and Electrostatic Powder Coating. This allows us to achieve control and quality from start to finish in our productions.
